TWO-WHEEL DRIVE

4WD
FOUR-WHEEL DRIVE

The machine is equipped with quick change device, which can realize the quick replacement of different attachments. This enables various operations including fork loading, shovel loading, clamping, aerial work, etc.

Key components are sourced from internationally renowned brands. Structural components are rigorously verified through both CAE analysis and actual measurements, ensuring high reliability.

COMFORT

01

Adjustable suspension seat can provide more ergonomic.

02

Full-proportional joystick, smooth and coordinated movements, smooth and steady on start and stop, boom luffing and telescoping support multi-movements.

03

7 inch display, real-time machine status monitoring, integrated intelligent fault diagnosis system.

04

The cab can be equipped with air conditioning, radio, and USB charging port as option.

MAINTENANCE

- A maintenance arm is provided on the vehicle to prevent the boom from accidentally falling during maintenance.
- Wide-angle tilting cover ensures easy maintenance access.

SAFETY

- The lighting system is excellent. Besides the High and low beam headlights, LED high-brightness working lights are also provided in the cab front and rear and the boom respectively, ensuring operation in night scenarios.
- Equipped with overload monitoring system, it can conduct real-time dynamic monitoring to prevent overturning and overloading, and timely restrict actions to avoid accidents.
